

Choose the right unit

For Kitchen taps
See page 3

Tamper proof
See page 4

Other units

- Threaded adaptors available (note the M refers to metric thread and the number to the diameter in mm)
M20 to M22

M24 to M22 - not common

M22 to M22 - female tap outlet to male

Email sales@tapmagic.co.uk or talk to your distributor

- Taps with plastic inserts. The existing insert maybe push-in or threaded, and can be difficult to take out without breaking. The Unifit models can be used provided the outlet diameter is 15 to 19mm.

Kitchen taps

The swivel unit shown below is ideal for kitchen taps. It fits both M24 and M22 tap outlets. Email sales@tapmagic.co.uk

Note: Some kitchen taps with separated flows for hot and cold water may not be suitable for attaching Tapmagic units.

Tamper Proof Housings

In some commercial situations it is useful to have units which are difficult to remove.

Email sales@tapmagic.co.uk or ask your distributor
